Buy and Sell signals are generated by technical indicators often referred to as "directional" indicators. In backtesting, best results were obtained when new positions were taken upon "New Buy" signals, and when stocks that generate a "Sell" were promptly removed from a portfolio. Since many of the stocks in this program carry above average risk, stocks should be bought only by investors financially able to purchase speculative stocks. Investors should be prepared to lose their entire investment and prudence should be displayed when entering a position. Trading based on these signals is available in a managed accounts program through Global Investment Solutions, LLC. For more information on this program, see http://www.mcoscillator.com/market_reports/rising_star_stocks.html or contact Roger Kliminski at 949-660-7960 or Roger@Globalinvestmentsolutions.com.
